| Subject: | MECHANICAL ENGINEERING DRAWING-I |
| Lesson Plan Duration: | 16 Weeks |

RATIONALE

Diploma holders in Mechanical Engineering are required to interpret drawings and therefore it is essential that they have skills of preparing drawings and sketches of mechanical components. This subject aims at development of drawing skills in the students.

Learning Outcomes

After undergoing this course, the students will be able to:

CO1. Interpret different limits and fits of components

CO2. Draw intersection of cylinders and their profile

CO3. Draw different kind of machine components like bearings, brackets, pulleys, pipe joints and lathe tool holder.

CO4. Draw electrical circuit diagram of simple household electrical circuits and home appliances

CO5. Read and interpret drawings of mechanical components
