

**Ramgarhia Polytechnic College,**  
**Phagwara**

**Computer Science Engineering**  
**Department**

Head of Department:	Er. Poonam Rana
Name of the Faculty:	Er. Gaganpreet Singh
Discipline:	CSE Department
Semester:	5 <sup>TH</sup>
Subject:	MICROPROCESSOR
Lesson Plan Duration:	16 Weeks

**RATIONALE**

In the real world of work, the technician is required to handle wide variety of instruments while testing, trouble shooting, calibration etc. The study of this subject will help students to gain the knowledge of working principles and operation of different instruments. During practical sessions, he will acquire the requisite skills.

## LEARNING OUTCOMES

After undergoing the subject, student will be able to:

CO1. Write, edit a machine language program using mnemonics

CO2. Describe all the internal parts and pins of 8085 and 8086

CO3. Write, execute and debug assembly language programs for simple applications.

CO4. Interface various peripheral devices with microprocessor.

CO5. Use various data transfer techniques used in microcomputers.

## Syllabus

Units	Details	Hours
1.	<p>Evolution of Microprocessor (3 hrs)</p> <ul style="list-style-type: none"> <li>- Typical organization of a microcomputer and functions of its various blocks <ul style="list-style-type: none"> <li>- Microprocessor, its evolution, function and impact on modern society</li> </ul> </li> </ul>	(03 hrs)
2.	<p>Architecture of a Microprocessor (With reference to 8085 microprocessor) (8 hrs)</p> <ul style="list-style-type: none"> <li>- Concept of Bus, bus organization of 8085</li> <li>- Functional block diagram of 8085 and function of each block</li> <li>- Pin details of 8085 and related signals</li> <li>- De-multiplexing of address/data bus of read/write control signals <ul style="list-style-type: none"> <li>- Steps to execute a stored programme</li> </ul> </li> </ul>	(08 hrs)
3.	<p>Memories and I/O interfacing (8 hrs)</p> <ul style="list-style-type: none"> <li>- Basic RAM Cell, N X M bit RAM, Expansion of word length and capacity, static and dynamic RAM, basic idea of ROM, PROM, EPROM and EEPROM</li> <li>- Memory organization, Concept of memory mapping, partitioning of total memory space, Address decoding, concept of I/O, mapped I/O and memory mapped I/O, interfacing of memory mapped I/O devices <ul style="list-style-type: none"> <li>- Concept of stack and its function</li> </ul> </li> </ul>	(08 hrs)
4.	<p>Programming (with respect to 8085 microprocessor) (14 hrs)</p> <ul style="list-style-type: none"> <li>- Brief idea of machine and assembly languages, Machines and Mnemonic codes</li> <li>- Instruction format and addressing modes, identification of instructions as to which addressing mode these belong</li> <li>- Concept of instruction set, Explanation of the instructions of the following groups of instruction set <ul style="list-style-type: none"> <li>Data transfer groups, arithmetic group, logic group, stack, I/O and</li> </ul> </li> </ul>	(14 hrs)

	<p>machine control group</p> <ul style="list-style-type: none"> <li>- Programming exercises in assembly language. (Examples can be taken from the list of experiments)</li> <li>- Serial data transfer using RIM and SIM instructions</li> </ul>	
5.	<p><b>Instruction Timing and Cycles</b></p> <ul style="list-style-type: none"> <li>- Instruction cycle, machine cycle and T-states</li> <li>- Fetch and execute cycle</li> </ul>	(03 hrs)
6.	<p><b>Interrupts (4 hrs)</b></p> <ul style="list-style-type: none"> <li>- Concept of interrupt</li> <li>- Maskable and non-maskable interrupts</li> <li>- Edge triggered and level triggered interrupts</li> <li>- Software interrupts</li> <li>- Restart interrupts and its use</li> <li>- Various hardware interrupts of 8085</li> <li>- Servicing interrupts, extending interrupt system</li> </ul>	(04 hrs)
7.	<p><b>Peripheral devices</b></p> <ul style="list-style-type: none"> <li>- 8255 PPI and 8253 PIT</li> <li>- 8257 DMA controller</li> <li>- 8279 Programmable KB/Display Interface</li> <li>- 8251 Communication Interface Adapter</li> <li>- 8155/8156</li> </ul>	(08 hrs)
8.	<p><b>Architecture of 8086 Microprocessor - Internal Architecture of 8086.</b></p> <ul style="list-style-type: none"> <li>- Concept of memory segmentation and physical address generation.</li> <li>- Memory and data addressing mode</li> <li>- Minimum and Maximum mode of 8086</li> </ul>	(08 hrs)
9.	<p><b>Instruction sets of 8086 - Instruction Format.</b></p> <ul style="list-style-type: none"> <li>- Data transfer.</li> <li>- Arithmetic</li> <li>- Bit and logical manipulation</li> <li>- String</li> <li>- Program transfer and processor control instructions</li> <li>- Assembler and assembler directives</li> </ul>	(08 hrs)

## Lesson Plan

Week	Theory		Practical	
	Lecture Day		Practical Day	
1 <sup>st</sup>	1 <sup>st</sup>	Evolution of Microprocessor  Typical organization of a microcomputer and functions of its various blocks	1.	Familiarization of different keys of 8085 microprocessor kit and its memory map.
	2 <sup>nd</sup>	Microprocessor, its evolution, function and impact on modern society		
	3 <sup>rd</sup>	Architecture of a Microprocessor  Concept of Bus, bus organization of 8085		
	4 <sup>th</sup>	Functional block diagram of 8085 and function of each block		
2 <sup>nd</sup>	5 <sup>th</sup>	Pin details of 8085 and related signals	2.	Steps to enter, modify data/program and to execute a programme on 8085 kit.
	6 <sup>th</sup>	De-multiplexing of address/data bus of read/write control signals		
	7 <sup>th</sup>	Steps to execute a stored programme		
	8 <sup>th</sup>	Memories and I/O interfacing  - Basic RAM Cell, N X M bit RAM, Expansion of word length and capacity,		

		static and dynamic RAM, basic idea of ROM, PROM, EPROM and EEPROM		
3 <sup>rd</sup>	9 <sup>th</sup>	- Basic RAM Cell, N X M bit RAM, Expansion of word length and capacity, static and dynamic RAM, basic idea of ROM, PROM, EPROM and EEPROM	3.	Execution of ALP on 8085 kit for addition/subtraction of two 8 bit numbers.
	10 <sup>th</sup>	Memory organization, Concept of memory mapping, partitioning of total memory space,		
	11 <sup>th</sup>	Address decoding, concept of I/O, mapped I/O and memory mapped I/O,		
	12 <sup>th</sup>	interfacing of memory mapped I/O devices		
4 <sup>th</sup>	13 <sup>th</sup>	Concept of stack and its function	4.	Execution of ALP on 8085 kit for Multiplication/Division of two 8 bit numbers.
	14 <sup>th</sup>	Brief idea of machine and assembly languages, Machines and Mnemonic codes		
	15 <sup>th</sup>	Instruction format and addressing modes,		
	16 <sup>th</sup>	identification of instructions as to which addressing mode these belong		
	17 <sup>th</sup>	Concept of instruction set	5.	Execution of ALP on
		Explanation of the instructions of the		

5 <sup>th</sup>	18 <sup>th</sup>	following groups of instruction set		8085 kit for arranging 10 numbers in ascending/descending order.
	19 <sup>th</sup>	Data transfer groups, arithmetic group, logic group, stack, I/O and machine control group		
	20 <sup>th</sup>	Data transfer groups, arithmetic group, logic group, stack, I/O and machine control group		
6 <sup>th</sup>	21 <sup>st</sup>	Programming exercises in assembly language.	6.	Execution of ALP on 8085 kit for 0 to 9 BCD counters (up/down counter according to choice stored in memory).
	22 <sup>nd</sup>	Serial data transfer using RIM and SIM instructions		
	23 <sup>rd</sup>	<b>REVISION</b>		
	24 <sup>th</sup>	<b>REVISION</b>		
7 <sup>th</sup>	25 <sup>th</sup>	<b>1<sup>st</sup> HOUSE TEST (TENTATIVE)</b>	7.	Interfacing exercise on 8255 like LED display control.
	26 <sup>th</sup>	<b>PTM</b>		
	27 <sup>th</sup>	Instruction cycle, machine cycle and T-states		
	28 <sup>th</sup>	Instruction cycle, machine cycle and T-states		

8 <sup>th</sup>	29 <sup>th</sup>	Fetch and execute cycle	8.	Demonstration of different keys of 8086-microprocessor kit and its memory map.
	30 <sup>th</sup>	Interrupts Concept of interrupt		
	31 <sup>st</sup>	Maskable and non-maskable interrupts		
	32 <sup>nd</sup>	Edge triggered and level triggered interrupts		
9 <sup>th</sup>	33 <sup>rd</sup>	Software interrupts	9.	Execution of steps to enter, check /modify data or program and to execute a program on 8086 microprocessor kit.
	34 <sup>th</sup>	Restart interrupts and its use		
	35 <sup>th</sup>	Various hardware interrupts of 8085 - Servicing interrupts		
	36 <sup>th</sup>	extending interrupt system		
10 <sup>th</sup>	37 <sup>th</sup>	REVISION	10.	Execution of ALP on 8086 kit for addition/subtraction of two 16 bit numbers(signed and unsigned).
	38 <sup>th</sup>	REVISION		
	39 <sup>th</sup>	2 <sup>nd</sup> HOUSE TEST (TENTATIVE)		
	40 <sup>th</sup>	<b>PTM</b>		

11 <sup>th</sup>	41 <sup>st</sup>	Peripheral devices -8255 PPI	11.	Execution of ALP on 8086 kit for Multiplication/Division of two signed/unsigned numbers.
	42 <sup>nd</sup>	8253 PIT		
	43 <sup>rd</sup>	8257 DMA controller		
	44 <sup>th</sup>	8279 Programmable KB/Display Interface		
12 <sup>th</sup>	45 <sup>th</sup>	8251 Communication Interface Adapter	12.	Revision
	46 <sup>th</sup>	8155		
	47 <sup>th</sup>	8156		
	48 <sup>th</sup>	Internal Architecture of 8086.		
13 <sup>th</sup>	49 <sup>th</sup>	Concept of memory segmentation.	13.	Revision
	50 <sup>th</sup>	Concept of physical address generation.		
	51 <sup>st</sup>	Memory addressing mode		
	52 <sup>nd</sup>	Date addressing mode		
	53 <sup>rd</sup>	Minimum and Maximum mode of 8086		

14 <sup>th</sup>	54 <sup>th</sup>	Introduction To Instruction sets of 8086	14.	Revision
	55 <sup>th</sup>	REVISION		
	56 <sup>th</sup>	Instruction Format.		
15 <sup>th</sup>	57 <sup>th</sup>	Arithmetic Instructions.	15.	Revision
	58 <sup>th</sup>	Bit and logical manipulation		
	59 <sup>th</sup>	String		
	60 <sup>th</sup>	Program transfer and processor control instructions		
16 <sup>th</sup>	61 <sup>st</sup>	Assembler and assembler directives	16.	Revision
	62 <sup>nd</sup>	REVISION		
	63 <sup>rd</sup>	REVISION		
	64 <sup>th</sup>	3 <sup>rd</sup> House Test (TENTATIVE)		

**NBA has defined the following seven POs for an Engineering diploma graduate:**

- i) **Basic and Discipline specific knowledge:** Apply knowledge of basic mathematics, science and engineering fundamentals and engineering specialization to solve the engineering problems.
- ii) **Problem analysis:** Identify and analyze well-defined engineering problems using codified standard methods.
- iii) **Design/ development of solutions:** Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specified needs.
- iv) **Engineering Tools, Experimentation and Testing:** Apply modern engineering tools and appropriate technique to conduct standard tests and measurements.
- v) **Engineering practices for society, sustainability and environment:** Apply appropriate technology in context of society, sustainability, environment and ethical practices.
- vi) **Project Management:** Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.
- vii) **Life-long learning:** Ability to analyze individual needs and engage in updating in the context of technological changes.

### **Program Specific Outcomes (PSOs)**

PSOs are a statement that describes what students are expected to know and be able to do in a specialized area of discipline upon graduation from a program. Program may specify 2-4 program specific outcomes, if required.

These are the statements, which are specific to the particular 11 program. They are beyond POs. Program Curriculum and other activities during the program must help in the achievement of PSOs along with POs.
